A 6 OR 12 WEEK ENGAGEMENT AND LEADERSHIP PROGRAM FOR WOMEN, INCORPORATING THE LATEST BRAIN SCIENCE RESEARCH

Designed to increase leadership behaviours and strengthen the path for progression and promotion of talented women.

Economic data supports having more women in senior positions. Greater representation of women in senior and management roles, means financial success and longevity for the organisation.

Catalyst studied 353 Fortune 500 companies and found companies with the highest representation of women in senior management positions outperformed those without, demonstrating a higher return on equity and to shareholders by more than one-third.

Sessions are designed to engage and inspire, whilst developing new thinking, habits and behaviour.

Support high potential women in your organisation through strengthening engagement, developing leadership thinking and building pathways for promotion.

By far the best program I have been involved in as it's not another 'training' session. It's a great practical program that gave everyone a voice and enabled them to really build us up as a united team with a real family environment. It quickly created a more focussed and energised working environment.
